

SaySuomi Advanced Speaking Assessment User Manual

Welcome to the user manual for the Advanced Speaking Assessment -functionality of the SaySuomi application. The Advanced Speaking Assessment has tasks that help users improve their Finnish speaking skills. Users can see their proficiency level and get feedback from an AI model on their pronunciation, range, accuracy, and fluency. Additionally, users can see how they are performing compared to other users on the same skill level.

The Advanced Speaking Assessment -functionality can be found by clicking the “Advanced” -button on the navigation bar.

When the user uses the Advanced Speaking Assessment -functionality for the first time, they must first give their consent to data collection carried out by the application. The user can read the privacy policy by clicking the "Open link" -button. If the user refuses consent, they cannot proceed to the next page.

Advanced

Using the Advanced Assessment -section requires some background informaton. Please fill out the form to proceed.

Progress

After giving their consent, the user has to fill out a background information form. All questions must be answered before proceeding to the next page.

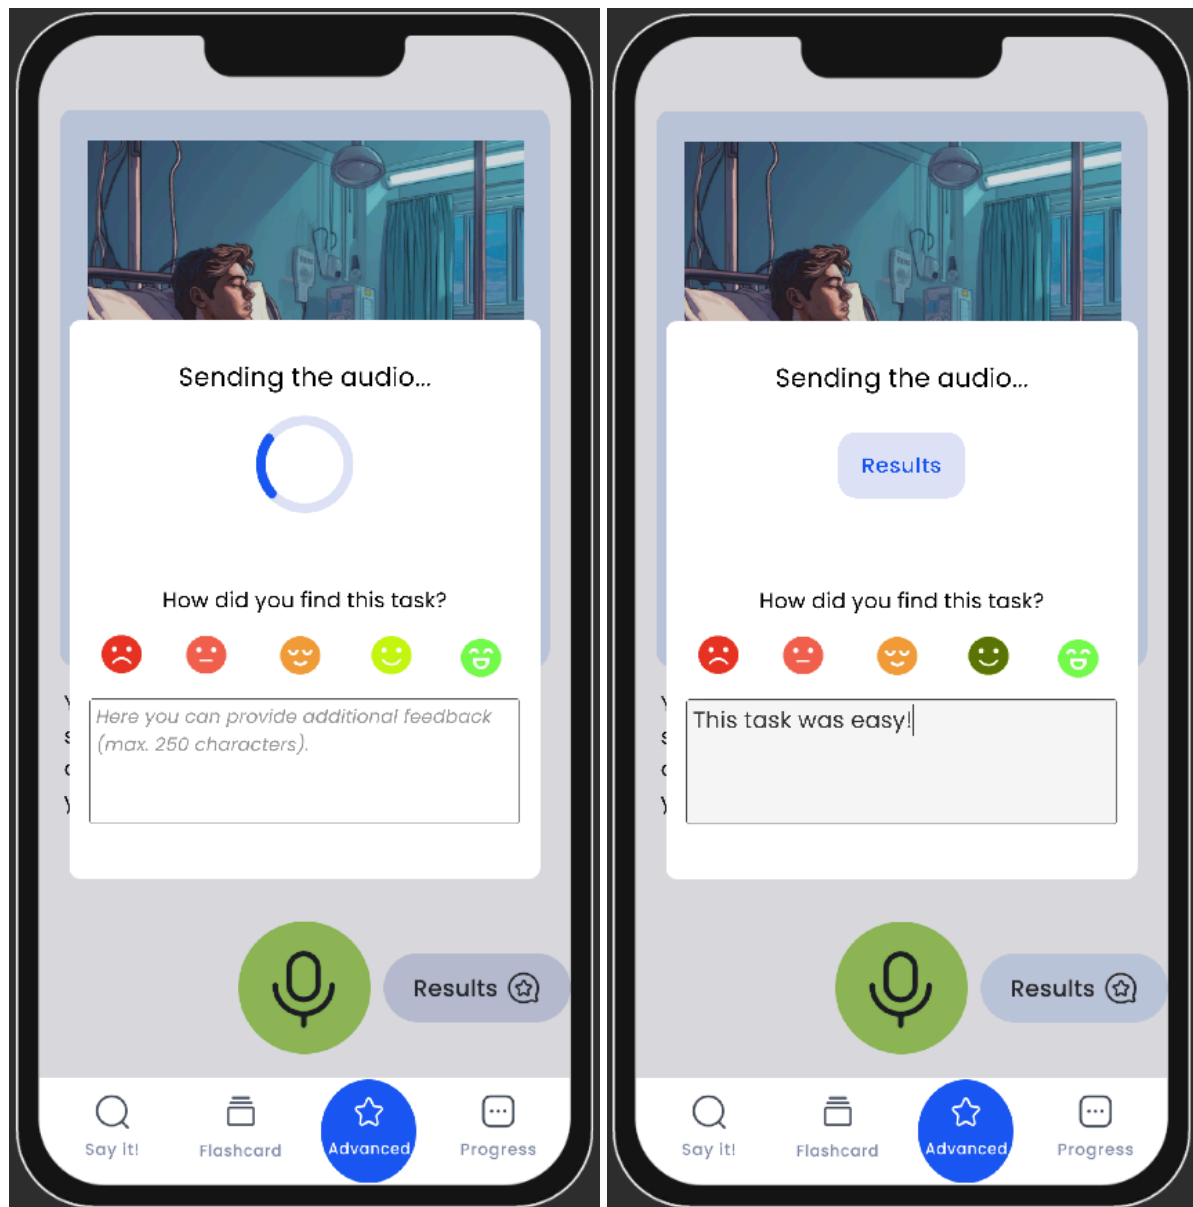

The first page under the Advanced Speaking Assessment -functionality is a task list, where the user can select from five different speaking tasks.

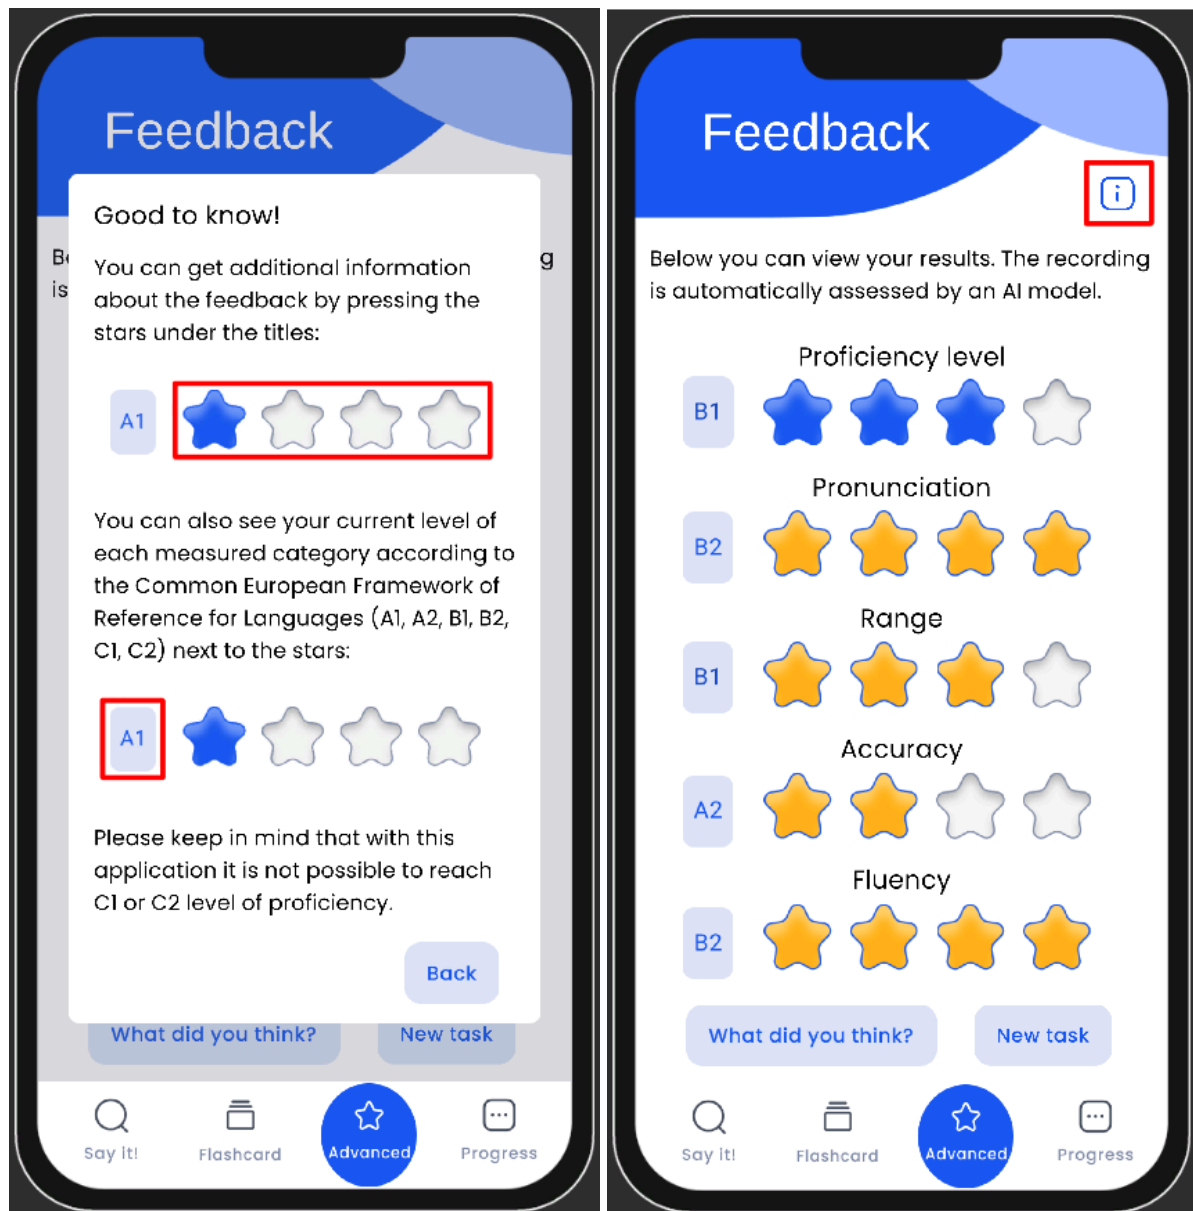

After selecting a task, the user can record their speech by pressing the green microphone icon and can stop the recording by pressing the square icon.

The user can listen to their recording by pressing the “Listen” -button, re-record by pressing the microphone icon, and see their results by pressing the “Results” -button.

After pressing the “Results” -button, the user can give feedback on the task while the server is loading the results. When the server is done loading, the user can enter the feedback view by pressing the “Results” -button that appears on the loading popup.

The first time the user enters the feedback view, they can see an info popup that explains how to get additional information about the results. The popup can be re-opened anytime by pressing the info button at the top of the page.

The user receives feedback in five different assessment categories. The feedback is displayed as both CEFR levels and stars. The user can get additional information about the assessment categories by pressing on the stars.

Feedback

Do you think the result is accurate?

Here you can provide additional feedback (max. 250 characters).

Was the result easy to understand?

Here you can provide additional feedback (max. 250 characters).

Progress

The “What did you think?” -button at the bottom of the feedback view lets the user give feedback about the accuracy and clarity of the results.

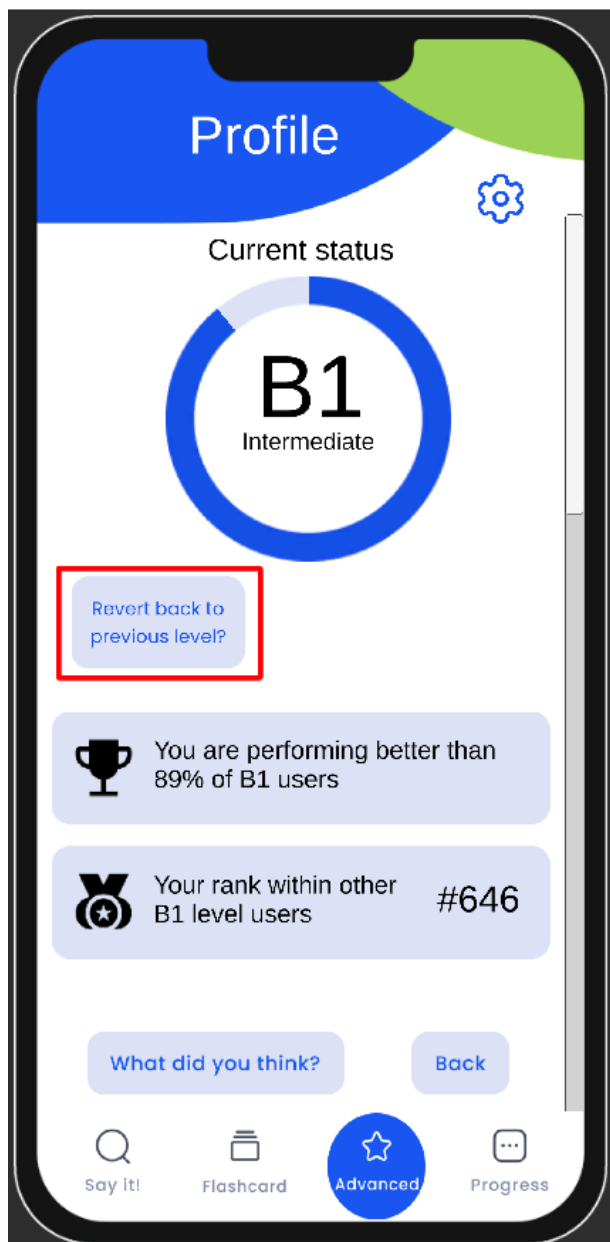

Every 5th task the user can give feedback on their overall experience using the Advanced Speaking Assessment -functionality.

Back on the task list, the user can enter their profile by clicking on the profile icon at the top of the page.

On the profile page, after the user has completed three tasks, they can view their progress and rank compared to other users on the same level.

If the user feels like their level is too advanced for them, they can revert back to the previous level by pressing the “Revert back to the previous level” -button. If the user has performed better than 90% of other users on the same level, they can move up a level by pressing the “Advance to the next level” -button.

The “What did you think?” -button at the bottom of the page lets the user give feedback about the profile page.

The user can enter the settings view by pressing the cogwheel icon at the top of the profile page. Here the user can view and copy their user ID for support purposes.
